DIGITAL COMMUNICATION SYSTEMS: WIRELESS IQ™

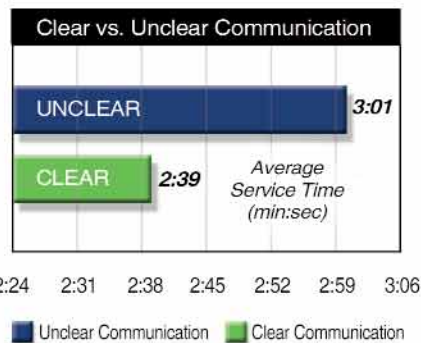

"I have worked in the QSR industry for over 13 years, and HME's new digital system is by far the best sounding system I have ever used."

—MIKE MILLER  
 General Manager,  
 Major Quick Service  
 Restaurant Manager

**INTRODUCING WIRELESS IQ FROM HME — A REVOLUTION**

**CLEAR COMMUNICATION MEANS FASTER SERVICE**

According to a recent study\*, restaurants with clear drive-thru communication could deliver food 22 seconds faster than those with unclear communication. By using Wireless IQ, you'll get exceptionally clear communication, accurate orders, and faster service.

\*Global Growth Group  
 Drive-Thru Communications Study

**WIRELESS IQ HIGHLIGHTS**

- 1 Incredible Digital Sound** provides crystal-clear, interference-free communication for fast, accurate orders.
- 2 Multi-Channel Communication** allows up to four crew members to communicate simultaneously with customers and privately with each other.
- 3 Digital Noise-Cancellation Technology** virtually eliminates distracting car noise from drive-thru communication and improves order accuracy.
- 4 Digital Spread Spectrum Technology** prevents unauthorized personnel from eavesdropping or interfering with your drive-thru communication.

## THE DIGITAL BREAKTHROUGH IN DRIVE-THRU COMMUNICATION

### THE NEED TO UPGRADE

Now, you have a compelling reason to upgrade your present analog system. HME Wireless IQ is the first digital drive-thru communication system available—operating at 2.4 GHz. Just as digital technology has revolutionized the music industry, Wireless IQ can transform your drive-thru communication with clear, pure sound.

### MULTI-CHANNEL COMMUNICATION

Unlike your current system, Wireless IQ allows multiple crew members to simultaneously communicate with drive-thru customers and privately with each other. This keeps more employees involved in the entire customer service process and enables a smoother flow of information. Simultaneous drive-thru communication provides faster, more accurate orders.

### EFFICIENT EMPLOYEE TRAINING

Store managers can use Wireless IQ to train the entire drive-thru crew. Using Wireless IQ's hands-free, multi-channel capability, managers can provide private instructions and constructive feedback to their crew, without interrupting communications with customers.

### COMPACT AND DURABLE

Wireless IQ has the lightest, most compact belt-pac on the market today, at only five ounces. This completely sealed, stylish design with rounded corners keeps dirt and grease out. The pliable, innovative pouch protects the belt-pac from contaminants and makes removal easy. Our reinforced cable and connector strengthens the headset and belt-pac connection for reliable use.

## UNIONARY LEAP TO CLEAR, DIGITAL DRIVE-THRU COMMUNICATION

### CRYSTAL-CLEAR, DIGITAL SOUND

By upgrading to the 2.4 GHz digital Wireless IQ, you'll get cleaner, clearer, better sound than you ever thought possible. And Wireless IQ comes with all of the latest technological advances to keep your drive-thru operating at peak efficiency. Crystal-clear communication means more accurate orders and faster service, keeping your drive-thru in the fast lane.

### SECURE, INTERFERENCE-FREE OPERATION

Wireless IQ's digital spread spectrum technology provides secure, private conversations, preventing unauthorized personnel from interfering with your drive-thru communication. With frequency-hopping, Wireless IQ prevents others from listening and breaking in to your conversations.

### A SMARTER SYSTEM

Wireless IQ comes with everything you need to operate a more friendly, efficient, and profitable drive-thru. The "auto-hands-free" mode automatically opens and closes communication, leaving your employees' hands free to multitask and serve customers more efficiently. And built-in voice prompts provide helpful drive-thru status and diagnostics.

5

**Digital Voice Prompts** take the guesswork out of drive-thru operation by providing employees with drive-thru status and system diagnostics.

6

**Auto-Hands-Free Mode** automatically opens and closes drive-thru communication as customers arrive and leave the speaker post or menu board.

7

**Longer Battery Life** allows up to 20 hours of belt-pac operation with each charge, extending the life of your battery.

8

**Digital Built-in Message Repeater** plays up to two different promotional messages or greetings the instant customers drive up to the menu board or speaker post.

9

**License-Free Digital System** keeps the cost of ownership down without the need for additional licensing fees.

## SPECIFICATIONS

### Base Station

---

Operating Frequency:	2400 to 2483.5 MHz	
Dimensions:	Width	12.88" (32.72 cm)
	Height	7.88" (20.02 cm)
	Depth	3.75" (9.53 cm)
Mounting:	Wall mount	
Voltage Input:	115 VAC	

### Battery Charger

---

Dimensions:	Width	7.75" (19.69 cm)
	Height	4.75" (12.07 cm)
	Depth	2.75" (6.99 cm)
Mounting:	Wall or table top	
Voltage Input:	115 VAC	

### General Specifications

---

Transmission Type:	Digital Frequency Hopping and Time Division Duplex
FCC Licensing:	Not Required

### Communicator Belt-Pac

---

Width:	3.75" (9.53 cm)
Height:	2.62" (6.65 cm)
Depth:	1.50" (3.81 cm)
Weight:	4.10 oz. (0.12 kg)

### Batteries for Communicator Belt-Pac

---

Type:	Lithium-Ion
Weight:	1.03 oz. (0.03 kg)

### Wireless IQ System Components

- > Base station
- > COMMUNICATOR® belt-pacs
- > Headsets
- > Battery charger
- > Belt-pac batteries
- > Microphone for speaker post
- > Speaker for speaker post
- > Belt-pac pouches
